

1. Double click on the cert file you have extracted ca.crt

Click on Install Certificate

## Then Local Machine

← Certificate Import Wizard

**Welcome to the Certificate Import Wizard**

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.
